ABOUT ME

MSc in Computer Science (Big Data) with a background in Python, APIs, and ML pipelines.
FullStack Engineer experienced in Python and React.

LANGUAGES

Spanish: Native
Catalan: Native
English: C1

WORK EXPERIENCE

Full-Stack Engineer and Consultant AgrospAI | Universitat de Lleida | January 2025 - present
Full Stack Engineer for the deployment, maintenance and improvement of an agricultural Dataspace.

- Participated in congresses, [public speech](#).
- Designed, implemented, tested and deployed smart contracts following Open Zeppelin's standards.
- Built and deployed APIs for product idea validation on self-owned K8s cluster.
- Created and built UIs for our products using NextJS.
- Implemented AI & data analysis algorithms as dataspace use-cases.
- Built tooling around core infrastructure (FastRAG, ocean-runner, etc)
- Worked with RAG systems, deployed vectorstores using dynamic content, contract events .

LLM, RAG, Solidity, NextJS, Docusaurus, FastAPI, Django, Docker, K8s, GraphQL, sklearn, TheGraph, Elasticsearch, Postgres, Debugging

Data Scientist Intern GFT IT Consulting S.L.U | March - July 2024

- Tested prompt quality via LLM response accuracy.
- Built demo using *Gradio*, uploading files and grading according to LLM response.
- Segmented images for *Computer Vision* ground truth dataset using *CVAT*.
- Trained models and compared results using *Pytorch* & *MLflow*

Data Scientist (HSINIR ML Research Project) Universitat de Lleida | 2023

Machine Learning analysis of hyperspectral imagery for agri-food applications.

- Analyzed hyperspectral data and produced graphical insights.
- Improved AI training and testing pipeline, testing different feature extraction and data augmentation techniques.
- Improved model accuracy by around 20%
- Improved application for batch processing.

EDUCATION

Grant holder (BIR) Deep Learning project

Co-author of a scientific publication [agri-food AI domain](#).

HackEPS Award (Hackathon 7th edition) [Best Programming Practices](#)

Santander X Explorer Entrepreneurship Program [Certificate](#)

Universitat de Lleida (UdL)

MSc in Computer Science | Big Data
(2024 - 2026) GPA 9.27/10

BSc in Computer Science | Computing
(2020 - 2024) GPA 8.73/10

OTHER SKILLS

Event-driven architecture

- Kafka, MQTT

Data Persistence, Querying & Caching

- **SQL** (Postgres, SQLITE)
- **NoSQL** (Elasticsearch, Milvus, Redis)
- **GraphQL**

CI/CD

- Docker, docker-compose. k8s

OPEN SOURCE CONTRIBUTIONS

FastRAG ([link](#))

CLI tool for automated RAG creation and testing

ocean-runner ([link](#))

Library for the development of algorithms within the decentralized environment of OceanProtocol.

oceanprotocol-job-details ([link](#))

Library for loading, validating and use of type hinted running job details for the OceanProtocol ecosystem
